

ANDREA GIULIANO

FINGERPRINT IDENTIFICATION HANDBOOK

DACTYLOSCOPY IN FORENSIC SCIENCE INVESTIGATION AND CRIMINAL JUSTICE

EDIZIONI MINERVA MEDICA

CONTENTS

FOREWORD	XV
-----------------------	-----------

PREFACE	XVII
----------------------	-------------

SECTION 1	1
------------------------	----------

CHAPTER 1 – HISTORY	3
----------------------------------	----------

1.1 Introduction	3
1.2 Prehistoric Hands	4
1.3 Ancient Marks	5
1.4 Forerunners	6
1.5 From <i>Anthropometry</i> to <i>Dactyloscopy</i>	7
1.6 Italian Way	10
1.7 Development of Dactyloscopy	12
References	13

CHAPTER 2 – HAND AND SKIN	19
----------------------------------------	-----------

2.1 Introduction	19
2.2 Hand	20
2.2.1 Short Anatomical Description	20
2.2.2 Touch, Prehension and Movement	22
2.2.3 Abnormalities	22
2.3 Skin	23
2.3.1 Hypodermis	24
2.3.2 Dermis	24
2.3.3 Dermal-Epidermal Layer	24
2.3.4 Epidermis	25
2.4 Glands	25
2.4.1 Eccrine Glands	25
2.4.2 Apocrine Glands	26
2.4.3 Sebaceous Glands	26
2.4.4 Variation and Admixture of Residues	26
2.5 Skin and its States	26
2.5.1 Normal, Dry or Oily Skin	27
2.5.2 Senile Skin	28
2.6 Friction Skin	28
2.6.1 Ridges and Furrows	29
2.6.2 Incipient Ridges	31

2.6.3	Pores	31
2.6.4	Anatomical Examination vs. Dactyloscopic Examination	31
References	32
CHAPTER 3 – EMBRYOGENESIS OF FRICTION RIDGES		35
3.1	Introduction	35
3.2	Development of Friction Ridges	36
3.3	Configuration of the Friction Ridge Patterns	36
References	37
CHAPTER 4 – FINGERPRINTS		39
4.1	Introduction	39
4.2	General Characteristics (Level 1)	40
4.2.1	Ridge Flows	40
4.2.2	Incipient Ridges	41
4.2.3	Core Area	41
4.2.4	Delta Area	42
4.3	Pattern Types	42
4.3.1	Main Classifications	43
4.3.2	Arches	44
4.3.3	Loops	45
4.3.4	Whorls	45
4.3.5	Compounds	47
4.4	Particular Characteristics (Level 2)	47
4.4.1	Minutiae	48
4.4.2	Main Types	49
4.4.3	Evaluation Difficulties	50
4.5	Microscopic Characteristics (Level 3)	50
4.5.1	Poroscopy	51
4.5.2	Overview	51
4.5.3	Taking and Comparison	52
4.5.4	Edgeoscopy	53
References	53
CHAPTER 5 – LOWER PHALANGE PRINTS (LOWER JOINTS)		57
5.1	Introduction	57
5.2	Morphological Description	58
5.2.1	Medial Phalange	59
5.2.2	Proximal Phalange	59
5.3	Identification Value	60
References	60
CHAPTER 6 – PALMPRINTS		63
6.1	Introduction	63
6.2	Presumptive Negative Aspects	64
6.3	Overview	64
6.4	Morphological Description	65
6.4.1	Interdigital Area	67
6.4.2	Hypothenar Area	67
6.4.3	Thenar Area	68
References	68
CHAPTER 7 – SOLEPRINTS		71
7.1	Introduction	71

7.2	Short Anatomical Description	72
7.3	Soleprints and Footprints	72
7.4	Overview	73
7.5	Morphological Description	74
7.6	Identification Value	74
	References	75
CHAPTER 8 – FRICTION RIDGE DISORDERS (POOR QUALITY PRINTS)		79
8.1	Introduction	79
8.2	Permanent or Temporary Effects	80
8.3	Causes	82
8.3.1	Creases of the Skin (White Lines)	82
8.3.2	Aging	83
8.3.3	Injuries (Scars)	83
8.3.4	Occupational Marks	84
8.3.5	High Level of Exposure or Contact with Harmful Substances	84
8.3.6	Medical Disorders	85
8.3.7	Alterations of Sweat Production	86
8.3.8	Effects of Medicines and Therapies	86
	References	86
SECTION 2		89
CHAPTER 9 – RECORDING CRIMINAL METHODS		91
9.1	Introduction	91
9.2	Identity and Identification	92
9.3	False Statements (Aliases)	92
9.4	Recording Systems and their Evolution	93
9.4.1	Photographic Method	94
9.4.2	Descriptive Method	96
9.4.3	Anthropometric Method	97
9.4.4	Dactyloscopic Method	98
	References	99
CHAPTER 10 – TAKING KNOWN PRINTS		101
10.1	Introduction	101
10.2	Taking by Ink	102
10.2.1	Rolled and Plain Prints	103
10.2.2	Taking Lower Phalange Prints	104
10.2.3	Taking Palmprints	104
10.2.4	Taking Major Case Prints	105
10.2.5	Problems	106
10.3	Taking by Live Scan	107
10.3.1	Sensors	108
10.3.2	Live Scan Requirements	108
10.3.3	Problems	109
10.3.4	Related to the Skin Conditions	109
10.3.5	Related to the Contact with the Sensor Surface	111
10.3.6	Related to the Devices	112
10.3.7	Control Programs	112
10.4	Other Techniques	113
10.4.1	Some Older Techniques	113

10.4.2	Photographic Method	114
10.4.3	Dusting-Tape Method	115
10.4.4	Special Chemically-Treated Paper Method	115
10.4.5	Replica Method	116
10.5	Summary Chart	116
	References	117
CHAPTER 11 – RECOGNITION BY MANUAL CLASSIFICATIONS		121
11.1	Introduction	121
11.2	Ten-Print Classifications	122
11.2.1	Uses and Tools	122
11.2.2	Problems	124
11.3	Five-Print Classifications	125
11.4	Single-Finger Classifications	125
11.5	Palmprint Classifications	126
11.6	Others	126
	References	126
CHAPTER 12 – RECOGNITION BY AFIS		129
12.1	Introduction	129
12.2	Historical Note	130
12.3	Databases	131
12.4	Main Processes	132
12.4.1	Acquisition	133
12.4.2	Analysis	133
12.4.3	Search (Ten-Print Database)	134
12.4.4	Verification (Ten-Print Database)	135
12.4.5	Search (Unsolved Latent Database)	135
12.4.6	Verification (Unsolved Latent Database)	135
12.4.7	Summary	136
12.5	Pre-Post AFIS	136
12.6	Problems	136
12.6.1	Direct	137
12.6.2	Indirect	137
12.6.3	Incidental	137
	References	138
SECTION 3		141
CHAPTER 13 – CRIME SCENE INVESTIGATION AND COLLECTION OF EVIDENCE		143
13.1	Introduction	143
13.2	Crime Scene Inspection	144
13.3	Fundamental Principles	144
13.4	Traces	145
13.5	Documentation	146
	References	146
CHAPTER 14 – LATENT PRINT STATES		147
14.1	Introduction	147
14.2	Evidence Prints	148
14.2.1	Faintly Visible Prints	150
14.2.2	Visible Prints by Addition	150

14.2.3	Visible Prints by Removal	150
14.2.4	Visible Prints by Impression	151
14.2.5	Latent Prints	151
14.2.6	Transferred Prints	151
14.2.7	Electronic Capture Prints	152
14.3	Evidence Prints (Differently Papillary)	152
14.3.1	Other Skin Impressions	152
14.3.2	Gloved Handprints	153
14.3.3	Animal Tracks	154
14.3.4	Fabric Textures	155
	References	155
CHAPTER 15 – LATENT PRINT DEVELOPMENT		157
15.1	Introduction	157
15.2	Development (in general)	158
15.2.1	Optical Techniques	159
15.2.2	Physical-Chemical Techniques	160
15.3	Development (in specific)	162
15.3.1	Print Development on Live or Dead Human Skin	163
15.3.2	Print Development on Nails	163
15.3.3	Print Development Techniques and DNA Profiling Techniques	164
15.3.4	Age Estimation of Papillary Traces	165
	References	165
CHAPTER 16 – LATENT PRINT REVERSED		171
16.1	Introduction	171
16.2	Reversal	172
16.2.1	Gray Level Method	173
16.2.2	Genuine Dimension	173
16.2.3	Tonally Reversed	174
16.2.4	Laterally Reversed	174
16.3	Latent Print States and Reversal	174
16.3.1	Faintly Visible Prints	175
16.3.2	Visible Prints by Addition	175
16.3.3	Visible Prints by Removal	175
16.3.4	Visible Prints by Impression	177
16.3.5	Latent Prints	177
16.3.6	Transferred Prints	177
16.3.7	Electronic Capture Prints	177
16.4	Reversal in relation to Lifting Techniques	178
16.4.1	Acetate Adhesive with a Black Cover	179
16.4.2	Acetate Adhesive with a White Cover	179
16.4.3	Acetate Adhesive with a Transparent Cover	180
16.4.4	Black Rubber Adhesive	180
16.4.5	White Rubber Adhesive	181
16.4.6	Transparent Rubber Adhesive	181
16.4.7	Silicone Rubber Compounds	181
	References	181
CHAPTER 17 – ANALYSIS		183
17.1	Introduction	183
17.2	Approaches	184
17.3	Requirements	185

17.4	Analysis Procedures	186
17.4.1	Technique	187
17.4.2	Instruments	187
17.4.3	Description	188
17.5	Problems	188
17.5.1	Related to the Quality and Quantity of the Traces	188
17.5.2	Related to the Accuracy of Reproduction	189
	References	189
CHAPTER 18 – COMPARISON		191
18.1	Introduction	191
18.2	Comparison Types	192
18.2.1	Comparison Against Elimination Prints	192
18.2.2	Comparison Against Known Prints of Suspects	193
18.2.3	Comparison Against Known Prints in Databases	193
18.3	Comparison Procedures	193
18.3.1	Requirements Check	194
18.3.2	General Examination	195
18.3.3	Particular Examination	196
18.3.4	Instruments	199
18.4	Problems	200
18.4.1	Related to the Quality and Quantity of the Traces	200
18.4.2	Related to the Natural Elasticity of the Skin	201
18.4.3	Related to Cases of Only Apparent Similarity	202
	References	203
CHAPTER 19 – LATENT PRINT RECOGNITION BY AFIS AND APIS		205
19.1	Introduction	205
19.2	Databases	206
19.3	Main Processes	206
19.3.1	Acquisition	207
19.3.2	Analysis	207
19.3.3	Search (Ten-Print or Palmprint Database)	208
19.3.4	Verification (Ten-Print or Palmprint Database)	208
19.3.5	Search (Unsolved Latent Database)	209
19.3.6	Verification (Unsolved Latent Database)	209
19.3.7	Summary	209
19.4	Pre-Post AFIS and APIS	210
19.5	Problems	211
19.5.1	Direct	211
19.5.2	Indirect	212
19.5.3	Incidental	213
19.5.4	Why are some Identifications Missed?	213
	References	216
CHAPTER 20 – EVALUATION AND VERIFICATION		219
20.1	Introduction	219
20.2	Evaluation	220
20.2.1	Exclusion	220
20.2.2	Individualization	220
20.2.3	Inconclusive	220
20.3	Verification	220
20.4	Court Exhibit	221

20.5	Approaches	224
20.5.1	Empirical Standard Approach vs. Holistic Approach	224
20.5.2	Proof of Presence Value vs. Proof of Guilt Value	227
20.6	Guarding Against Error	228
20.6.1	Human Factor	230
20.6.2	New Technologies Factor	231
20.6.3	Procedural Factor	232
20.6.4	Concluding Remarks and Possible Safeguards	233
	References	234

SECTION 4 **241**

CHAPTER 21 – IDENTIFYING THE DECEASED AND MISSING PERSONS **243**

21.1	Introduction	243
21.2	Historical Background	244
21.3	Stages of Death	247
21.3.1	Rigor Mortis	247
21.3.2	Putrefaction	247
21.3.3	Maceration	248
21.3.4	Mummification	248
21.3.5	Saponification	249
21.3.6	Burned	249
21.3.7	Injuries	249
21.4	Taking Impressions	249
21.4.1	Precautionary Warnings	250
21.4.2	Techniques	251
21.4.3	Direct Methods (without contact)	252
21.4.4	Indirect Methods (by contact)	253
21.4.5	Indirect Methods (by making a replica)	253
21.4.6	Treatment Methods (by restorative solutions)	255
21.4.7	Removal Methods (by adapting the skin)	255
21.4.8	Electronic Methods (by optical scan)	255
21.5	Search Procedures	256
21.5.1	Official Channel	256
21.5.2	Alternative Channel	257
21.5.3	Main Processes	257
21.5.4	Some Routine Cases	258
21.6	Mass Disasters	260
21.6.1	Processes and DVI Form	260
21.6.2	Cooperative Approach and DVI Team	262
21.7	Missing Persons	263
	References	265

CHAPTER 22 – ATTEMPTS TO COUNTERFEIT FINGERPRINTS **269**

22.1	Introduction	269
22.2	Attempts to Prevent Recognition	270
22.2.1	Expedients Used to Alter the Friction Ridges	270
22.2.2	By Sharp or Pointed Tools	270
22.2.3	By Abrasions	271
22.2.4	By Burns	271
22.2.5	By Caustic Substances	272
22.2.6	By Maceration	272

22.2.7	By Stratification	272
22.2.8	By Plastic Surgery	274
22.2.9	Overview	274
22.2.10	Illegible Fingerprints	276
22.2.11	Workable Solutions	277
22.3	Attempts by Fake Prints	277
22.3.1	False Registration	278
22.3.2	False Authentication	278
22.3.3	False Presence	278
22.3.4	Overview	279
22.3.5	Workable Solutions	280
22.4	Attempts by Forged Prints	280
22.4.1	Adulteration	280
22.4.2	Tampering	281
22.4.3	Manipulation	281
22.4.4	Overview	281
22.4.5	Workable Solutions	282
22.5	Attempts to Not Place Prints	282
	References	283
CHAPTER 23 – BIOMETRIC RECOGNITION		287
23.1	Introduction	287
23.2	Historical Background	288
23.3	Biometrics and Recognition	289
23.3.1	Main Biometric Parameters	289
23.4	Biometric Fingerprint Recognition	290
23.4.1	Processes	291
23.4.2	Enrollment Step (Capturing, Extraction and Storage)	291
23.4.3	Recognition Step (Matching)	292
23.5	Errors	292
23.5.1	Enrollment Step Errors	292
23.5.2	Recognition Step Errors	292
23.6	Applications	293
23.6.1	Public	293
23.6.2	Private	294
23.6.3	Commercial	295
23.7	Immigration and Cross-Border Service Applications	295
23.7.1	Border Protection	295
23.7.2	Passport	296
23.7.3	Visa Information System	296
23.7.4	Residence Permit	296
23.7.5	Eurodac	297
23.7.6	Schengen Information System	297
23.7.7	Cross-Border Cooperation, Data Exchange (Prüm Decision) and Accreditation (EN ISO/IEC 17025)	297
23.8	Civilian Fingerprinting Extension	298
	References	299
CHAPTER 24 – DACTYLOSCOPY AND ARCHAEOLOGY		303
24.1	Introduction	303
24.2	Fields	304
24.2.1	Prehistoric Depictions	304
24.2.2	Impressions of Ancient Artifacts	304

24.2.3	Painting Impressions	305
24.3	Purposes	305
24.4	Overview	306
24.5	Controversies	308
	References	308

CHAPTER 25 – DACTYLOSCOPY AND ANTHROPOLOGY 311

25.1	Introduction	311
25.2	Fields	312
25.2.1	Pattern Evolution	312
25.2.2	Character Frequency	312
25.2.3	Symmetry Relationships	313
25.2.4	Variation due to Gender or Age	313
25.2.5	Inheritability in Populations	313
25.2.6	Inheritability in Households	313
25.2.7	General Similarities in Identical Twins	314
25.3	Other Fields	314
25.3.1	Mummy Prints	314
25.3.2	Primate Prints	314
25.3.3	Prints in Nature	315
25.4	Purposes	315
25.5	Overview	316
25.6	Controversies	317
	References	318

INDEX 321
